

Shiftboard Vacation Bidding

powered by Zaddons

Efficient, Compliant, and Fair Vacation Bidding

Much like employee scheduling, vacation bidding is a complex process that's subject to strict rules and has a direct impact on the work-life balance of your employees.

Zaddons vacation bidding integration is a Shiftboard product extension that automates site-specific vacation bidding processes and rules. After the vacation bidding process is complete, Shiftboard seamlessly updates schedules based on bidding outcomes. This provides schedulers and managers with powerful tools to address staffing needs effectively while also strictly adhering to scheduling rules.

By incorporating vacation bidding into Shiftboard's scheduling tool, you can boost scheduling managers' efficiency, ensure rule compliance, and promote fairness. Ultimately, this contributes to a happier workforce at every stage of the decision-making process related to schedules.

Capabilities

Rich Configurations to Match Your Site's Vacation Bidding Process and Rules
